

Mission Command

OneSAF Mission Command Adapter (MCA) can stimulate a wide range of Army Mission Command (MC) systems.

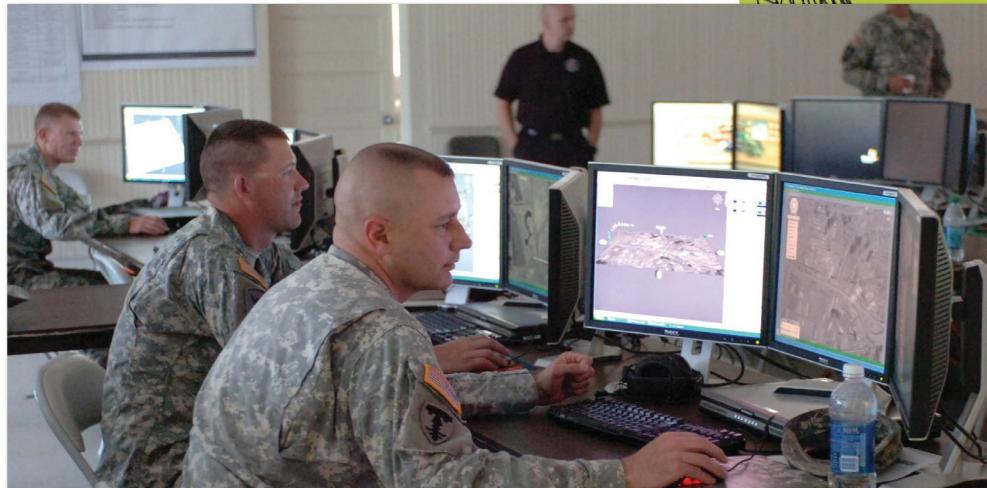

Supports Breadth of Army Mission Command Systems

- ▶ Supports stimulation of Army tactical devices used for:
 - Maneuver – Command Post of the Future (CPOF), Force XXI Battle Command Brigade & Below (FBCB2), FBCB2 Joint Battle Command Platform (JBC-P)
 - Fire support – Advanced Field Artillery Tactical Data System (AFATDS)
 - Intel – Distributed Common Ground System – Army (DCGS-A)
 - Air defense – Air and Missile Defense Workstation (AMDWS)
- ▶ Many tactical message sets are supported, including:
 - Data Dissemination Service (DDS)
 - US Message Text Format (USMTF)
 - Variable Message Format (VMF)
 - Tactical Digital Information Link (TADIL-J)
- ▶ Provides web service interface for Army simulation systems to communicate with tactical systems in a standardized manner
- ▶ Uses Common Message Processor to accurately create and process tactical messages

OneSAF MCA Compatibility

- ▶ Compatible with emerging Army standard mission command system frameworks
- ▶ Interoperates with Army Command Post Computing Environment (CPCE)
- ▶ Integrated with SitaWare Commercial Off-The-Shelf product for communicating with tactical systems in CPCE
